Background

- Tech since the 90s
- Variety of industries and countries
- Business focus and tech passion
- Advising

CEOs

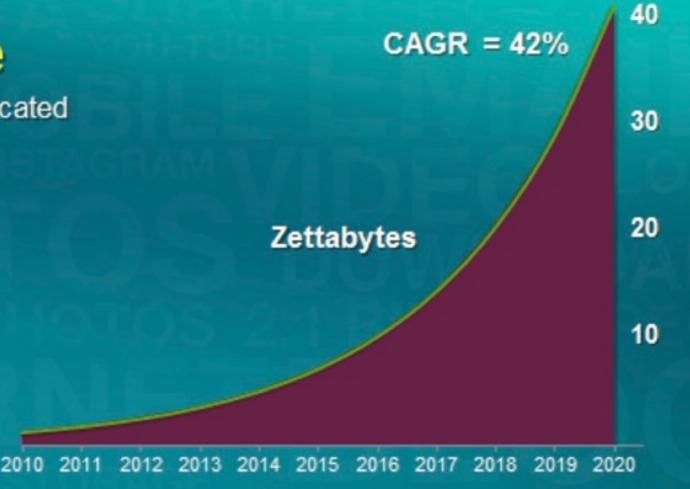

How Big is the Digital Universe?

Using the IDC / EMC Study of the Topic

The Digital Universe

The measure of all digital data created, replicated and consumed in a single year

Source: IDC Digital Universe Study, sponsored by EMC, December 2012

Seagate Confidential

"Most CDOs are doomed before they ever show up for their first day of work."

https://twitter.com/digHBS/status/624550100103245824

So it goes...

- Cheaper storage/missing features in RDBMS
- Hadoop/No(!)SQL
- No(not only)SQL
- Spark SQL
- Postgres wins the Internet

96 * 128GB = ~ 12TB

Data Science : Data Analytics :: Brain Surgery : General Medicine. We NEED more GPs, brain tumors are not all that common (luckily). **#data**

8:52 AM - 22 Jun 2016

Data and Tech

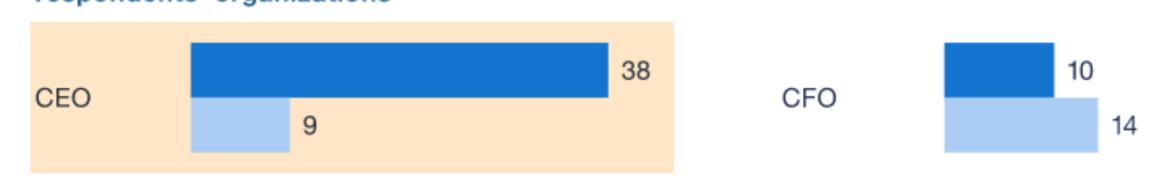

- Yahoo releases ~14TB of customer interaction data (JAN 2016)
- Google releases Tensorflow (NOV 2015)
- Amazon releases DSSTNE (Deep Scalable Sparse Tensor Network Engine) (MAY 2016)

Where's the value?

Leadership

"...executives say senior-leader involvement and the right organizational structure are...even more important than its technical capabilities or tools."

CEOs are much likelier than all other C-level respondents to cite themselves as leaders of the analytics agenda.

% of respondents,¹ by role CEOs, n = 256 All other C-level executives, n = 175

Who is primarily responsible for data and analytics agenda at respondents' organizations

What to do?

- Grow leadership capabilities
- Build analytics, not Data Science
- Get an overview of other areas (HR, Marketing, etc.)
- Start positioning
- Or wait...

Plot twist...
